

Pacific Palisades Village - Permavoid Installed 2018

You're Invited

Symposium:

**Resilient Landscapes &
Storm Water Management:
Creating sustainable cities through
creative LID water management**

**WHEN: TUESDAY
OCTOBER 22, 2019
10 AM - 3 PM**

**WHERE: DOUBLETREE HOTEL
120 S. LOS ANGELES ST.
LOS ANGELES, CA**

Key Note Speakers:

Joris Voeten, MSc
Steve Williams

Symposium Topics:

Global & Local Water Challenges
Water Balance Modeling
Storm Water Structural Subbases
Storm Water First Irrigation
Connected Blue-Green Roofs
Urban Tree Solutions
LID Planter Designs

Joris Voeten, MSc

With an MSc in Tropical Forestry from Wageningen University in the Netherlands, Joris translates his knowledge of plant and tree growth to create livable and green cities. Worldwide, people move to cities and sufficient and high quality green

infrastructure in the urban environment is essential to create livable cities for tomorrow, today.

Joris develops functional green space for cities by designing durable tree-pit growing sites in dense and hardscaped urban areas and by creating innovative usable and multifunctional green space on rooftops. Energy reduction, storm water attenuation, material re-use, biodiversity, urban heat island mitigation and local circular processes play a key role in all of the designs and concepts, each with its own composition of structural- and water management systems, soils and substrates and plant species selection. And to be able to research the actual functionality and effect of the designed concepts, pilot projects are always part of the package.

This is a complimentary event thanks to our sponsors:

ABT, INC.

Steve Williams

Steve received his Bachelors of Science degree in Civil Engineering in 2005. During his studies he was an engineering tutor, ASCE student chapter president, captain of the men's varsity golf team and worked for the New York State Department of Transportation.

After University Steve went on to work for ABT, Inc, a leading manufacturer of storm water management systems as the Regional Manager for the Northeastern United States.

Over the last 4 years he has served as the Director of Environmental Products, consulting with design professionals on effective storm water management solutions with an emphasis on water conservation, green infrastructure and sustainability.
